Scheduled tasks to be done by next report:

Task 1: Create separate landing page and search results page

Task 2: Search filtering functionality

Task 3: Make menu bar component

Task 4: Restructure CSS, make pages more "pretty"

Noteworthy risks, concerns, or problems:

Concern: creating user profile - have not had much experience with creating user profiles in web applications (still haven't addressed this concern)

Concern: using information from user questionnaire - need to figure out how to store information from questionnaire and personalize recommendations for each separate user based on preferences (still haven't addressed this concern)
